

# File Specifications

<b>File Specifications</b>	
Supply Via	CD, DVD, Camera Card, Memory Stick, Email, FTP, Online Ordering via ROES through our website <a href="http://www.pcl.co.nz">www.pcl.co.nz</a>
Format	JPEG or TIFF. TIFF's are to be 8 bit, flattened and saved as IBM PC with no LZW compression. Use Jpegs only through ROES.
Colour Mode	sRGB or Adobe RGB 1998. Use sRGB only through ROES.
Image Size	100% of final print size. Please also advise us of the print size required, so we know what sheet size to charge your job on.
PPI	300 (please see note below about large files. Lower ppi's acceptable, just ensure the image size is set to the print required)
Photoshop Files	Must have no Layers, no Paths and no Alpha Channels and saved as JPEG or TIFF as above.
File Naming	File names must be short with no special characters and include the file extension name e.g. Sunset.jpg
Colour Manage	Colour management information is on our website and must be in place for some services.
CMYK	Exact reproduction of CMYK or Pantone colours is not guaranteed as we print using RGB.
Trimming Guides	Please add a 1mm black keyline around files for trimming on Premium , Canvas, Fine Art and Black & White Print services.
Large Files	We have found no advantage in using files larger than 600mb. Therefore please do not exceed 600mb.
